About IIMM :

Indian Institute of Materials Management (IIMM) is a premier Institute of the country to promote professional excellence in the field of materials management. It has a pan India presence with a wide network of 56 branches IIMM, through its various educational courses, training programmes, conferences, workshops, seminars, consultancy services and in house publications continuously strives to equip the materials management professionals with the latest tools and techniques needed to develop new and innovative approaches in the supply chain domain. The institute is recognized by the Indian Society for Technical Education (ISTE) under Ministry of HRD. It is a charter member of the International Federation of Purchasing and Supply Chain Management (IFPSM), an umbrella body of global supply chain institute, USA, having presence in 40 countries. IIMM has also established Centre for Research in Materials Management (CRIMM) in association with Techno India University of Kolkata to drive in-depth and analytical research in the field of supply chain.

IIMM offers various courses, notable among these are, Post Graduate Diploma in Materials Management (PGDMM), Post Graduate Diploma in Supply Chain Management and Logistics (PGDSCM/L), Diploma in Materials and Logistics Management.

About the Course :

DMLM Course has been specially designed for the participants who wish to pursue their career in materials management. The materials management profession is under constant evolution - the challenge is how to establish strategic sources or to manage inventory, or logistics sector to satisfy the current rising trend in the market demand coupled with supply constraints. The materials managers have their task cut out today to maintain the customer service level by re-balancing supply with demand. This necessitates building a multi-disciplinary knowledge in materials management to rigorously monitor the adaptability of the fast-changing supply side at the macro level. With this end in view, the participants will be taught the concept of integrated materials management, interrelationship among various departments, flow of information and documents to make a seamless journey from planning and provisioning to sourcing, storing and operations. The sessions on logistics will help students identify modern warehousing with extensive use of automation, economizing transportation cost through consolidation and outsourcing. Adequate exposure to statistical tools and information technology will help enhance the skill set of the materials management professionals to showcase their learning in a structured and systemic manner.

Assessment :

Assessment will be done through an online written examination to be held at the end of each semester. Due weightage will be given to internal assessment, which will be done by the faculty based on attendance, participation in classroom discussion, case studies, group task/group discussions and performance in viva-voce. Students will also be given due exposure to gain practical knowledge by way of Plant/ Warehouse visit.

ELIGIBILITY:

Graduates/Diploma holders in any discipline or Higher Secondary School Certificate (10+2) preferably with 2 years' work experience.

FEES:

The total course fee including study materials and Examination is Rs.30,000/- (Rupees Thirty Thousand only) payable in two equal instalments.
